## ***NATURAL CLEANING TIPS***

# ***STRIPPING LAUNDRY***

amy  
baumetz

### **Gather:**

1/4c Washing  
Soda  
1/4c Borax  
1/4c OnGuard  
Laundry  
Detergent

### **Instructions:**

Remove residue left by commercial laundry detergents!  
Fill your bathtub with very hot water. Add the DIY solution. Add your laundry and use a long stick or pole to push everything under water and swirl it around. Make sure everything is submerged. Soak for about 4 hours or until the water has cooled down.

Go in every hour and give it a good stir. Then remove them, wring them out well, and put them through your washer (no detergent!)
